Problem

- Merchants rely on cash, manual stock, and word-of-mouth.
- Rural communities excluded from digital commerce.
- Consumers face high costs and limited payment options.

Vision

- Build an AI-driven super-app for inclusive trade, logistics, payments, and content.
- Empower merchants, suppliers, and communities.
- Drive financial inclusion and job creation across Southern Africa.

Product

- QwertyHub — instant store creation via simplified dropshipping.
- AskMacGyver — AI problem-solving and predictive insights.
- ACBPay Wallet — peer-to-peer transfers, merchant payments, cash-in/cash-out.
- QwertyTV & QwertyMusic — creator monetization and cultural relevance.
- WhatsApp integration for rural inclusivity.
- Morongwa — built-in messenger: chat, voice, and video for orders, errands, and community.
- Errands — local deliveries, collections, and micro-jobs matched to trusted runners.

Qwertz — Video Editing Suite

- Short vertical 9:16 clips up to 90 seconds for Wall and QwertyTV.
- Phase 1: FFmpeg trim/crop, text, filters, job queue, export hooks.
- AskMacGyver AI captions; Phase 2 scene detect, subtitles, QwertyHub publish.

Market & Customer

- Target: SMEs, retailers, suppliers, logistics companies, and consumers.
- Engagement: 200+ customers interviewed/tested.
- Merchant pilots: 50+ testing QwertyHub.
- Feedback: strong demand for simplified commerce + WhatsApp access.

- 200+ active customers.
- 50+ merchants onboarded.
- Early revenue from errands, supplier onboarding, wallet transactions.
- Ongoing pilots with suppliers and retailers.

Business Model

- Revenue streams: marketplace commissions, errands fees, wallet transactions, content monetization, AI premium services.
- Key assumptions: merchant adoption, WhatsApp accessibility, supplier partnerships, regulatory compliance.
- Projected revenue: USD 250k – 1M in first 12 months.

Competitive Landscape

- Competitors: Takealot, Jumia, Bolt.
- Differentiation: simplified dropshipping, WhatsApp accessibility, AI support, integrated payments, content ecosystem.

Team

- Ariel Madisha (Founder & CEO): 20+ years in finance, audit, and municipal asset management. Transitioned into tech with MERN stack, PHP, Node.js, React, and GitHub contributions. Experience in digital commerce, supplier integrations, and grassroots projects.
- Francinah Madisha (Operations & UX): UX diploma + UI certificate (UX Design Institute). Web development (IT Academy SA). Graphic design (University of Cape Town). Strong background in logistics, retail, and supplier management.
- Full-time commitment to scaling Qwertymates.

Funding Ask

- Raise: R500,000 – R1,500,000 (~USD 30k – 90k).
- Minimum ticket: R250,000 (~USD 15k).
- Use of funds: merchant expansion, AI enhancement, regional scaling.

Qwertymates

Motivation: leverage mentorship, partnerships, pilots, and fundraising readiness.

Support needed: commercial growth, corporate partnerships, AI enablement, market expansion.

Milestones: onboard 500+ merchants, scale AskMacGyver, expand regionally, grow ACBPay adoption.

Closing

- Mission: Empower merchants, suppliers, and communities with inclusive digital commerce.
- Vision: Scale Qwertymates into Southern Africa as the leading AI-driven super-app.
- Call to action: Partner with us to accelerate inclusive growth.
